rental car.

Maximum usage period:7days

Support a safe and secure
driving in HOKKAIDO !

The Four Main Features of "NexT"

1

Car Navigation

You can use the car navigation provided by
Navitime Japan! It is always updated with the
latest map information, and its detailed
guidance display supports safe and secure
driving.

2

Recommended travel routes

This application will introduce recommended
travel routes that can be accessed by rental
car. The recommended routes can be
seamlessly set in the app's car navigation.

3

Traffic rules challenge

A quiz on important Japanese traffic rules
and traffic signs will be conducted during the
first use of the app to support safe and secure
driving.

4

Driving diagnosis

A report analyzing driving characteristics will
be issued after driving. Let's aim for a high
score and practice safe driving!

We can free lend the **Wi-Fi devices** to those
who can cooperate with the trial
experiment!

※Limited to first 5 groups per day.

※Limited to customers arriving and departing
from New Chitose Airport Poplar Shop.

↑ Recommended travel routes are [here](#)!

3

Traffic rules challenge

Learn the commonly misunderstood Japanese traffic rules

Questions on traffic signs and rules

This app will present quizzes on Japanese traffic rules and signs that are particularly difficult for foreigners to understand. There will also be explanations, so let's learn and adhere to the traffic rules for a safe and enjoyable drive in Japan!

How to Download

Click [here](#) →

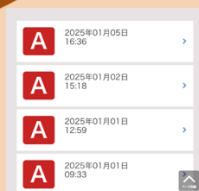

<Only for Android OS>

1. Please read the document on how to download from the QR code.
2. Register as a beta version tester and then download the app.
3. Enter the ID and password provided when you rent the car.
4. Let's get started! ※This app is a test version

4

Driving diagnosis

Let's reflect on the driving!

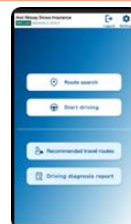

Diagnostics with every drive

This app will diagnose driving from the perspectives of speed, rapid acceleration, and rapid deceleration. The safer your driving, the higher your score will be, so let's reflect on each drive and ensure a safe and enjoyable travel!

Safety caution during a drive

Make sure to securely mount your smartphone in a holder.

Set your destination in this app and start route guidance. Driving diagnostics will be conducted in conjunction with the start and end of the route guidance. Even if you do not use route guidance, you can still utilize this app for driving diagnostics.
